1 ---> [While you may not consider this a response to you documents, I feel it is as it still affects the main problem.  
I am against any nuclear dump in Nevada. Nuclear waste is the problem of the individual nuclear sites and their communities. Storing it in my state is only passing the buck, making their problem my problem. Storing it in canisters is only passing the buck to future generations, letting them deal with your mess after you are dead and gone.  
Therefore, I am against any and all issues that contribute to the existance of a nuclear repository in this state.]
